DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 7, 8, 11, and 13-19, drawn to electroluminescent displays, classified in class 428, subclass 690.
 - II. Claims 4-6, 9, 10 and 12, drawn to methods of manufacturing an EL display device, classified in class 427, subclass 66.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product of claim 1 can be made by a process other than the process of claim 4, because the product does not require a substrate. The product of claim 7 may be formed by a method other than the method of claim 9; the buffer layer may be oxidized prior to forming the layer on the anode. The product of claim 11 may be formed by a method other than light irradiation per method claim 12 such as forming the desired conjugate length of the polymer prior to forming the organic layer.

Art Unit: 1774

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

If group I is chosen, a species must be selected from the following:

- A. The EL element of claims 1-3
- B. The EL element of claim 7 and 8
- C. The EL display device of claim 11
- D. The emission device of claims 13-18
- E. The device of claims 13-17 and 19

If group II is chosen, a species must be selected from the following:

- A. The method of manufacturing per claims 4-6
- B. The method of manufacturing per claims 9 and 10
- C. The method of manufacturing per claim 12

5. A telephone call was made to Stephen Adrian on December 4, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant's representative requested a written restriction/election requirement.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)

Art Unit: 1774

7. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

8. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

9. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

10. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dawn Garrett whose telephone number is (703) 305-0788. The examiner can normally be reached Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia Kelly can be reached at (703) 308-0449. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-2351.
